

Aero^o Mate™

Moisturizer & Mask Sealer

- Made with Aloe to smooth skin
- Alleviates troublesome air leaks
- Non-Petroleum based

While today's CPAP masks are made with very comfortable materials and are fitted for your individual needs by your CPAP provider, some CPAP users may find they are still susceptible to a couple of familiar complaints: mask leaks and skin irritation.

AeroMate™ Moisturizer and Mask Sealer helps to alleviate these concerns with its non-petroleum and Aloe based formula by soothing sensitive skin while simultaneously sealing around the CPAP mask. AeroMate™ is also safe for use with oxygen, and can help reduce skin irritability from the use of nasal cannulas.

Product	Part #	UPC # (ea.)	UPC # (Case of 12)
AeroMate™	CY-K8802	663427408028	663427458023
